### 5) How to help kids with the program – 30 minutes (Matt)

Age appropriate learning -- working with and teaching various age groups

### 6) Manual content and Teaching Outline– 90 minutes (Alayne & Jessica)

### 7) Ideas for chunking of manual content – 15 minutes (Jessica- with Alayne & Matt)

Possible approaches to using manual:

1. Use the Teaching Outline and decide what you can realistically fit into a club meeting. Tailor it according to your needs.
2. Do a series of club meetings where you focus on one activity per meeting. Choose activities that you think would work well for your group. Present, discuss and ask questions about the concepts related to each activity.
3. Simply start at the beginning of the manual and go through, chapter-by-chapter, discussing and asking questions about the content. Do as many activities in the process as you choose.
4. Divide your club into small groups (try to have older kids in each group that can help the younger ones) and assign each group 3-5 pages in a chapter. Give them time to identify and review the key principles on these pages and then have them present what they've learned to the rest of the group. (You'll need to know the key points ahead of time so you can assist them if they miss anything important.)
